

Quick start guide

Water leak detector
Wireless IoT

ealloora

ENGLISH

1. Download the App

Download the Ealloora App from Apple Store or Google Play.

Install the Ealloora App and receive notifications on your smartphone in case of water leakage and/or overturn detection.

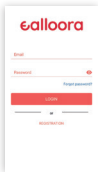

2. Create an account

New Account

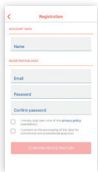

Enter the name, email, password and password confirmation.

Existing Account

If you already have an account, log in with your email and password.

The screenshot shows the ealloora login interface. At the top, the ealloora logo is displayed in red. Below it, there are two input fields: "Email" and "Password". The "Password" field has a red eye icon to its right and a "Forgot password?" link below it. A red "LOGIN" button is positioned below the input fields. At the bottom of the screen, there is a "REGISTRATION" link in red.

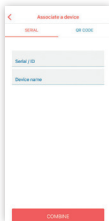

The screenshot shows the ealloora registration interface. At the top, there is a back arrow and the word "Registration" in red. Below this, there are two sections: "ACCOUNT DATA" and "YOUR NEW DATA". The "ACCOUNT DATA" section has a "Name" input field. The "YOUR NEW DATA" section has "Email", "Password", and "Confirm password" input fields. Below these fields, there are two checkboxes: "I hereby take note of the privacy policy (mandatory)" and "I consent to the processing of my data for promotional and marketing purposes". A red "CONTINUE REGISTRATION" button is at the bottom.

3. Register the device

1. On the application home screen, click on the  button to register a device.
2. Insert the Serial/ID code (8 characters) that you will find on the label on the back of the device.
3. Give the device a name.

COMBINE

4. Activation

1. Put the device onto a water-filled plate (2+mm of water). The Leak will beep twice.
2. Remove from water. After 15 seconds, three short beeps announce that the device is armed.
3. Place the device to the area you would like to monitor.

5. Alerts

After overturning or water leakage detection you have 10 seconds (indicated by beeping) to fix the device before the appropriate alarm is sent. When there's no water leakage or displacement detected anymore, an end of event message is sent.

6. Deactivation

To turn the device off, hold it upside-down for 15 seconds. The device will continue to beep until it turns itself off and sends a deactivation message.

7. Receive notifications on your smartphone

Make sure the notifications for the App Ealloora are enabled on your smartphone

8. Done

Now LEAK is ready to warn you of any water leakage and/or overturn detection.

Done!

**Your device is
working!**

FRANÇAIS

1. Téléchargez l'application

Téléchargez l'application Ealloora sur Apple Store ou Google Play.

Installez l'application Ealloora et recevez des notifications sur votre smartphone en cas de fuite d'eau et/ou de détection de renversement.

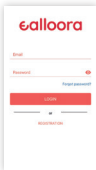

2. Créez un compte

Nouveau Compte

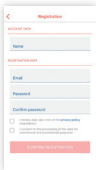

Entrez le nom, l'e-mail, le mot de passe et confirmation mot de passe.

Compte Existant

Si vous avez déjà un compte, connectez-vous avec votre email et mot de passe.

The screenshot shows the login interface for ealloora. At the top, the ealloora logo is displayed in red. Below it, there are two input fields: 'Email' and 'Password'. The password field has a red eye icon to toggle visibility. A blue link 'Forgot password?' is located below the password field. A prominent red button labeled 'LOGIN' is centered below the fields. At the bottom, there is a red button labeled 'REGISTRATION'.

The screenshot shows the registration interface for ealloora. At the top, there is a back arrow and the title 'Registration'. Below this is a section for 'ACCOUNT DATA' with a 'Name' input field. The next section is 'REGISTRATION DATA', which includes 'Email', 'Password', and 'Confirm password' input fields. Below these fields are two checkboxes: 'I hereby acknowledge the processing of my data for commercial and promotional purposes.' and 'I consent to the processing of my data for commercial and promotional purposes.' A red button labeled 'COMPLETE REGISTRATION' is at the bottom.

3. Enregistrez l'appareil

1. Sur l'écran d'accueil de l'application, cliquez sur le bouton  pour enregistrer un appareil.
2. Entrez Serial/ID (8 caractères) figurant sur l'étiquette à l'arrière de l'appareil.
3. Donnez un nom à l'appareil

4. Activation

1. Placez l'appareil sur une plaque remplie d'eau (2 + mm d'eau). LEAK émettra deux bips.
2. Retirer de l'eau. Après 15 secondes, trois bips courts annoncent que l'appareil est armé.
3. Placez l'appareil dans la zone que vous souhaitez surveiller.

5. Alertes

Après la détection d'un renversement ou d'une fuite d'eau, vous disposez de 10 secondes (indiquées par un bip) pour réparer l'appareil avant que l'alarme appropriée ne soit envoyée. Lorsqu'il n'y a plus de fuite d'eau ou de déplacement détecté, un message de fin d'événement est envoyé.

6. Désactivation

Pour éteindre l'appareil, maintenez-le à l'envers pendant 15 secondes. L'appareil continuera à émettre un bip jusqu'à ce qu'il s'éteigne et envoie un message de désactivation.

7. Recevoir des notifications sur votre smartphone

Assurez-vous que les notifications pour l'application Ealloora sont activés sur votre smartphone.

8. Terminé

Maintenant, LEAK est prêt à vous avertir de toute détection de fuite d'eau et/ou de renversement.

Fini!

**Votre appareil
fonctionne!**

ITALIANO

1. Scarica l'App

Da App Store o da Google Play scarica l'App Ealloora.

Installa l'App Ealloora e ricevi notifiche sul tuo smartphone in caso di rilevamento di perdita d'acqua e/o ribaltamento.

2. Crea un account

Nuovo Account

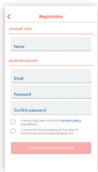

Inserisci nome, e-mail, password, e conferma della password.

Account Esistente

Se possiedi già un account, inserisci e-mail e password.

The screenshot shows the login page for ealloora. At the top, the logo "ealloora" is displayed in red. Below it, there are two input fields: "Email" and "Password". The "Password" field has a red eye icon to toggle visibility and a link for "Forgot password?". A prominent red "LOGIN" button is centered below the fields. At the bottom, there is a "REGISTRATION" link.

The screenshot shows the registration page for ealloora. At the top, there is a back arrow and the title "Registration". The page is divided into two sections: "ACCOUNT DATA" and "YOUR PROFILE DATA". The "ACCOUNT DATA" section includes input fields for "Name", "Email", and "Password". The "YOUR PROFILE DATA" section includes a "Confirm password" field and two checkboxes: "I hereby declare that I am of the legal age (18+)", and "I consent to the processing of my data for administrative and promotional purposes". A red "CONTINUE REGISTRATION" button is at the bottom.

3. Registra il dispositivo

1. Nella schermata iniziale dell'applicazione, fare clic sul pulsante  per registrare un dispositivo.
2. Inserisci l'ID (8 caratteri) che troverai sull'etichetta sul retro del dispositivo.
3. Assegna un nome al dispositivo.

4. Attivazione

1. Posizionare il dispositivo su una piattino pieno d'acqua (2 + mm di acqua). LEAK emetterà due segnali acustici.

2. Rimuovere dall'acqua. Dopo 15 secondi, tre brevi segnali acustici annunciano che il dispositivo è allarmato.

3. Posizionare il dispositivo nell'area che si desidera monitorare.

5. Alerts

Dopo il ribaltamento o il rilevamento di perdite d'acqua, si hanno 10 secondi (indicati da un segnale acustico) per riposizionare il dispositivo prima che venga inviato l'allarme appropriato. Quando non vengono più rilevate perdite d'acqua o spostamenti, viene inviato un messaggio di fine evento.

6. Disattivazione

Per spegnere il dispositivo, tenerlo capovolto per 15 secondi. Il dispositivo continuerà a emettere un segnale acustico finché non si spegne e invia un messaggio di disattivazione.

7. Ricezione notifiche su smartphone

Assicurati che le notifiche per l'App Ealloora siano abilitate sul tuo smartphone.

8. Fatto

Ora LEAK è pronto per avisarti di eventuali perdite d'acqua e/o ribaltamenti.

Fatto!

ESPAÑOL

1. Descargue la aplicación

Desde Apple Store o Google Play, descargue la aplicación Ealloora.

Instale la aplicación Ealloora y reciba notificaciones en su smartphone en caso de detección de fugas de agua y/o vuelco.

2. Cree una cuenta

Nueva Cuenta

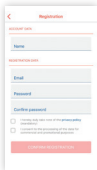

Ingrese el nombre, correo electrónico, contraseña y confirmación de la contraseña.

Cuenta Existente

Si ya tiene una cuenta, ingrese con su correo electrónico y contraseña.

The screenshot shows the login page for ealloora. At the top, the ealloora logo is displayed in red. Below it, there are two input fields: "Email" and "Password". The "Password" field has a red eye icon to toggle visibility. A "Forgot password?" link is located below the password field. A large red "LOGIN" button is centered below the fields. At the bottom, there is a "REGISTRATION" link.

The screenshot shows the registration page for ealloora. At the top, there is a back arrow and the word "Registration" in red. Below this, there are two sections: "ACCOUNT DATA" and "REGISTRATION DATA". The "ACCOUNT DATA" section contains a "Name" input field. The "REGISTRATION DATA" section contains "Email", "Password", and "Confirm password" input fields. Below these fields are two checkboxes: "I hereby acknowledge the privacy policy" and "I consent to the processing of my data for commercial and promotional purposes". A large red "COMPLETE REGISTRATION" button is at the bottom.

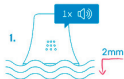

3. Registre el dispositivo

1. En la pantalla de inicio de la aplicación, haga clic en el botón  para dar de alta un dispositivo.
2. Inserte el ID del dispositivo (8 caracteres), que encontrará en la etiqueta de la parte posterior del dispositivo.
3. Asigne un nombre al dispositivo.

4. Activación

1. Coloque el dispositivo en un plato lleno de agua (2 + mm de agua). LEAK emitirá dos pitidos.
2. Retirar del agua. Después de 15 segundos, tres pitidos cortos anuncian que el dispositivo está encendido.
3. Coloque el dispositivo en el área que le gustaría controlar.

5. Alertas

Después de la detección de un vuelco o una fuga de agua, tiene 10 segundos (indicados mediante un pitido) para restaurar el dispositivo antes de que se envíe la alarma correspondiente. Cuando ya no se detecta ninguna fuga o desplazamiento de agua, se envía un mensaje de fin de evento.

6. Desactivación

Para apagar el dispositivo, manténgalo boca abajo durante 15 segundos. El dispositivo seguirá sonando hasta que se apague y envíe un mensaje de desactivación.

7. Recepción de notificaciones en su smartphone

Asegúrese de que las notificaciones para la App de Ealloora están habilitadas en su smartphone.

8. Hecho

Ahora LEAK está listo para advertirle de cualquier fuga de agua y/o detección de vuelco.

¡Hecho!

¡Su dispositivo

está funcionando!
