

# Quick start guide

Smart current detector  
Wireless IoT

€alloora

ENGLISH

## 1. Download the App

From the App Store or Google Play download the Ealloora App.

Install Ealloora App and receive notifications on your smartphone in case of interruption and/or restoration of electricity.

## 2. Create an account

### New Account

Enter the name, email, password and password confirmation.

### Existing Account

If you already have an account, log in with your email and password.

The image displays two screenshots of the ealloora mobile application's registration process.

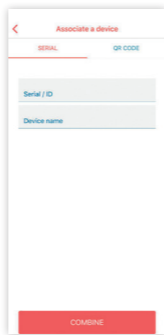

The left screenshot shows the login screen. At the top is the ealloora logo. Below it are two input fields: "Email" and "Password". A red eye icon is visible next to the password field. Below the password field is a link that says "Forgot password?". A large red button labeled "LOGIN" is centered below the fields. At the bottom, there is a horizontal line with the word "or" in the center, and a red button labeled "REGISTRATION" below it.

The right screenshot shows the registration form. At the top left is a back arrow, and at the top right is the title "Registration". Below the title is a section labeled "ACCOUNT DATA" with a red underline, containing a "Name" input field. Below that is a section labeled "REGISTRATION DATA" with a red underline, containing "Email" and "Password" input fields, and a "Confirm password" input field. Below the input fields are two checkboxes with the following text: " I hereby duly take note of the [privacy policy](#) (mandatory)." and " I consent to the processing of the data for commercial and promotional purposes". At the bottom is a large red button labeled "CONFIRM REGISTRATION".

### 3. Register the device

1. On the application home screen, click on the  button to register a device.
2. Insert the ID code (8 characters) that you will find on the label on the back of the device.
3. Give the device a name

< Associate a device

SERIAL QR CODE

Serial / ID

Device name

COMBINE

## 4. Switch ON

On the back of the device there is a ON/OFF switch, move the VOLT switch to ON position.

Once in the ON position, a led will light green on the front of the device, and then a few moments, a red LED will flash showing the correct operation of the device.

Insert VOLT into an outlet, if it's possible, near a window and check the correct reception of the message in the application.

If you do not receive the message, set VOLT to another location where you can have better coverage.

## **5. Receiving notifications on smartphones**

Make sure the notifications for the App Ealloora are enabled on your smartphone.

## **6. Done**

Connect the VOLT device to the power outlet. Now VOLT is ready to warn you of any interruptions and/or restoration of electricity.

**Done! Your device is  
monitoring the network**

## 7. Safety warnings

Do not open or attempt to repair the product, it could be exposed to danger due to high voltage or other risks. Opening a sealed product will invalidate the warranty.

This product has an on/off switch, this switch is a method to turn off the product. Another way to turn it off is to disconnect the product from the power outlet and remove the internal batteries.

Do not use near water. Use of this product near water may result in exposure to high voltage danger.

In case of problems contact the customer care from [www.ealloora.com](http://www.ealloora.com)
